Electronics Retailer Store Manager

Re: E-Cycling Toolkit

Dear Store Manager,

As you may be aware, the New Jersey legislature enacted the "NJ Electronic Waste Management Act" in 2011 which prohibits the disposal of TV's, computers and monitors in with regular garbage. In an effort to educate both consumers and commercial institutions, enclosed please find an "E-Cycling Toolkit" which is a top ten list of ideas designed to encourage electronic retailers to promote electronics recycling to their customers. By using all or at least some of its components, the Toolkit will help educate you and your customers on the proper ways to handle e-waste in accordance with the Electronic Waste Management Act.

The Association of New Jersey Household Hazardous Waste Coordinators (ANJHHWC) is a 501 (c) (3) association made up of individuals from government, commercial, and private sectors. Our mission for 2012 is to spread the word about the various E-Cycling programs that are currently available to all NJ residents. Our slogan for this campaign is: "E-Cycling is Free, Easy and It's the Law." We hope that you join this effort and choose to implement some of our Toolkit ideas. To download our E-cycling PSA or the E-cycling reminder sticker or button templates, please visit ANJHHWC's website, [www.njhazwaste.com](http://www.njhazwaste.com) and click on the E-Cycling logo.

As you use our "Toolkit" to enhance E-Cycling, please take the time to continue other environmental stewardship programs and assess whether you are properly managing the "traditional" mandated recyclables such as office paper, cardboard, co-mingled (bottles and cans), and newspapers.

If you have any questions with regards to your local E-Cycling programs and/or the mandated recyclables in your area, please contact your County or Municipal Recycling Coordinator (see enclosed list of County Coordinators).

Thank you for your anticipated cooperation,

*JoAnn Gemenden*

JoAnn Gemenden, President  
ANJHHWC
